ACL™ ANALYTICS 10.5

Release the Power - ACL™ Analytics 10.5 Turbocharges Script Debugging and Microsoft® Excel® Workflow

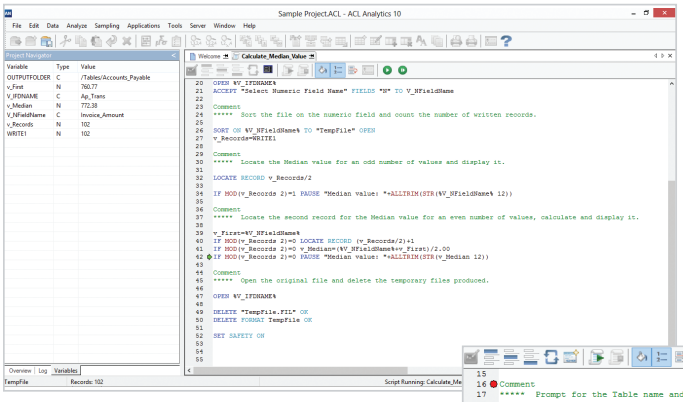

Only a few short months ago, ACL unveiled ACL Analytics 10 (AN 10). Since then, ACL has been busy building new power features and functions to deliver the second release of ACL Analytics this year. AN 10.5 upgrades are designed to significantly enhance the ability to work with scripts and Microsoft® Excel® files. New innovations include script debugging tools and the ability to make scripts more powerful. Release the power with AN 10.5.

RELEASE HIGHLIGHTS INCLUDE:

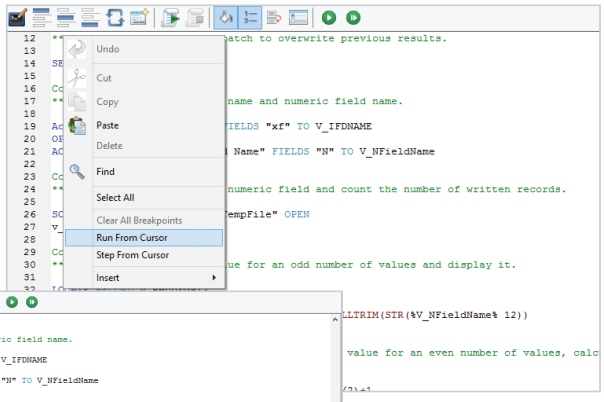

Awesome new script debugging tools rapidly allow users to find issues and optimize scripts

New capabilities include:

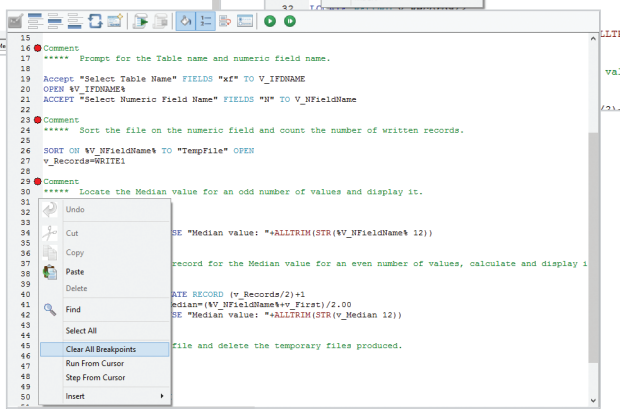

- **Variable panel** - updates as users work with their script so they can visualize the inner workings of the scripting engine.
- **Script step-mode** - step through a script command by command and review system settings as the script runs.
- **Break point(s)** - insert one or multiple break points to pause complex scripts and see what the system state looks like at that point.
- **Run from cursor** - quickly fix an error and restart the script at the cursor point.

Variable Panel

Run from Cursor

ABOUT ACL

ACL delivers technology solutions that are transforming audit and risk management to give organizations unprecedented control over their business.

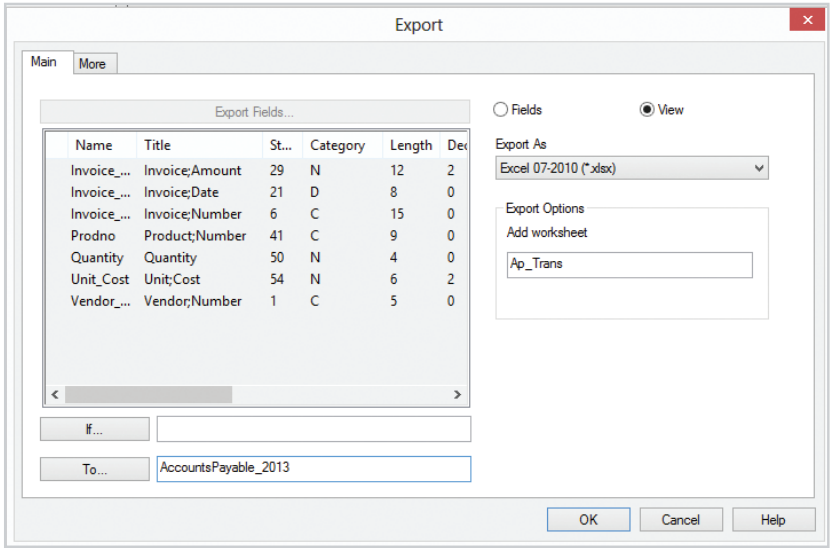

Our integrated family of products—including our cloud-based governance, risk and compliance (GRC) solution and flagship data analytics products—are used at all levels of the enterprise to help maximize growth opportunities by identifying and mitigating risk, protecting profits, and accelerating performance.

Thanks to 25 years of experience and our consultative approach, we implement flawlessly so customers realize concrete business results fast at low risk. Our actively engaged community of more than 14,000 customers around the globe—including 89% of the Fortune 500 and hundreds of governments—tells our story best.

Serious improvements for working with Excel import and export commands

New capabilities include:

- **Export enhancements** - gives users the ability to export results to multiple worksheets.
- **Import optimization** - imports are now faster than ever.
- **New Excel import engine** - users will instantly notice:
  - » improved accuracy of data type detection
  - » stability and reliability for large file imports
  - » all data is imported even if it does not conform to the defined data type
  - » imports >255 columns and characters per cell
  - » expanded file type supported (.xlsm)

Export Excel

More tools to create powerful scripts give advanced script writers greater power

Capabilities include:

- **New 'SAVE LAYOUT TABLE TO {filename} command** - see what is contained in a table.
- **New mathematical functions** - SIN(), COS(), TAN() and PI() functions now available.

PLUS,
OVER 20 REPORTED USER ISSUES HAVE BEEN FIXED.
